INDEX TO VOLUME 83

Compiled by Marion Anne Jenkinson

This index is primarily one to new information. Previously published information, which has been referred to in this volume, has not been indexed unless extensive comparisons or reinterpretations were involved. Also not included are the many avian species given (pp. 426–431) as prey items for accipiters and the various birds mentioned (pp. 457–467) in the Report of the Committee on Bird Protection. For some species, especially ones not in the A.O.U. Check-list area, scientific names only have been entered. New generic, specific, and subspecific names are printed in **boldface** type.
